

EDM.NET
Smart Client

EDM.NET Smart Client

Smart Client with integrated basic scanning and "Rich Client" functionality used with any of the editions to the left. Scan paper into a PDF document and file directly into EDM.NET.

Overview

EDM.NET Smart Client allows full access to our powerful web-based document management products through web services. It includes an integrated scanning module (with optional OCR capabilities) that allows you to scan, index, and file documents into EDM.NET seamlessly. All the power of our document management solution in a fast, self-updating smart client application. Built on the Microsoft .NET 2.0 Framework it uses the latest and best technologies available on the market today.

Benefits

- Utilizes local resource – load placed on client
- Connected – part of larger distributed solution
- Intelligent Install and Update – "ClickOnce" update
- Client device flexibility – runs on various devices
- Supports scanning of documents into EDM.NET

Wireless Access To Your Documents

With the inexpensive costs of wireless devices such as Tablet PCs, you can now access your documents from anywhere in the world. All you need is an Internet connection and our EDM.NET Smart Client. You will be able to retrieve and review your documents allowing greater freedom and flexibility. Imagine being at a client site and remotely accessing your client's information, files, and documents. EDM.NET makes it possible.

Administration

EDM.NET Smart Client requires little to no administration once it is installed and configured. Employees can easily access EDM.NET from inside/outside the office using web services. Searching for a document is simple and e-mailing it is a click away.

Note: The features described above depend on the version of the Smart Client purchased and optional modules purchased.

Smart Client Basic Scanning Edition

The basic scanning module allows for scanning of images and filing them directly into EDM.NET for later retrieval.

Smart Client Basic is used in conjunction with either EDM.NET Lite, Professional, WorkGroup, or Enterprise Editions. It uses a traditional windows application to communicate with the backend to any of the EDM.NET Editions via Web Services (SOA).

Features

Actions	Description
Scan New Document	Creates a new document to be scanned.
Scan & Append to Current Document	Scans a page in the scanner and appends it to the current document.
Open	Opens a document.
Append Images	Appends image files to the current document.
Save	Save current document without filing it to EDM.
Save As	Save current document to a different location and/or filename without filing it into EDM.
Print	Prints current document out to printer.
Close	Closes active document.
Copy Page	Copies selected page.
Paste Page	Pastes copied page.
Delete Page	Removes selected page from document.
Rotate Left	Rotates selected page to the left.
Rotate Right	Rotates selected page to the right.
